

**PROBLEM: DIALER DOESN'T DELIVER THE MESSAGE IN OPERATE MODE.**

1. You may have pager (YES) option selected for that particular telephone number,  
or
2. Message wasn't accepted at time of programming channel.

Resolution:

Press M to Go to "Test T-Line". Press (2) NO; at "Test:Channels" Press (1) Yes. Select problem channel. Observe settings and listen for message. Particularly verify that number is a telephone or cell phone not a pager. If message isn't heard and number is appropriate you should reprogram message.

Press M to go to Program Numbers, Press No for options till you get to Program Channels and say YES. Select the problem channel and be prepared to Reprogram it.
